Profile

I graduated from an intensive 3 month Front End Engineering program at The Iron Yard and I am seeking to expand my new skill set in web development. I have the strong ability to work effectively under pressure. Can identify problems/needs and initiate effective solutions. Promote a working environment and procedures conducive to improving productivity, increasing efficiency, enhancing quality and strengthening the bottom line. Consistently "gets the job done" and exceeds expectations. Effective communication and interpersonal skills; a team player; interacts positively with a diverse group of people; and establishes relationships based on respect.

Education/Training

Graduated Las Vegas High School | 2005
Graduated The Iron Yard | Certified Front End Developer | 2016

Skills

HTML, CSS, JavaScript, Backbone, JQuery, Mustache, ReactJS, Node, Underscore, GIT, and GitHub
Basic understanding of Back End programs such as Python, Django, and Java
Familiar with all Microsoft Office programs
Proficient in troubleshooting and basic technical issues
Proficient with Salesforce and SalesLoft
Ability to multitask and work under pressure

Projects

IronFoos | Hackathon Project | https://ironfoos.herokuapp.com/
Summary: We had a Hackathon sponsored by The Iron Yard and the theme was games. My partner came up with the idea of creating a Foosball tournament creator since everyone at The Iron Yard plays foosball during breaks, why not create something they could use so they are able to track their winning streak or losing streak.
Technology: HTML, CSS, JavaScript, Django, Python, and Postgres

JTO Restaurant | Group Project | jto-restaurant.surge.sh
Summary: We were given a group assignment to create a restaurant website for a mock client. What my part was in this project was that I came up with the layout design and color scheme, picked out the images that were going into the site, and did my part of the coding. We split the entire site into 3 equal parts all doing HTML, CSS, and JavaScript.
Technology: HTML, CSS, JavaScript, Ajax, and jQuery

Etsy | JavaScript Project | http://jaimariev.github.io/etsy-project/
Summary: We chose a page from Etsy and had to recreate it exactly to the best of our knowledge. This was our introduction to javascript.
Technology: HTML, CSS, Ajax, and jQuery

Work Experience

The Iron Yard | Las Vegas Campus
Operations Assistant | July 2016 - Present

Caesars Entertainment | Planet Hollywood
Box Office Supervisor | December 2013 - May 2015

BASE Entertainment | Planet Hollywood
Box Office Supervisor | March 2007 - December 2013
